INFO**HIGH SPEED ASCENT ALARM**

SEL TO CHANGE ON/OFF ALARM SPEED

ESC TO RETURN

An ascent at too high speed increases the risk of decompression sickness! This function is strictly reserved for instructors who take full responsibility for the disactivation of the high speed ascent alarm (AL.SP).

In any event, when activating this function the computer will show a barred speaker icon during the entire dive.

**TISSUE ERASE**

↓ **SEL** ↑ **ESC**

SWITCH TO YES AND PUSH SEL. FOR 5 SEC. TO ERASE THE TISSUE

If you decide to erase the tissue nitrogen saturation using the T.ERASE function, the computer will not be able to calculate any successive dives in relation to nitrogen saturation! In any event, do not use this function if 48 hours have not passed since the last dive.
